

Sarvathan C

Full Stack Developer | Electrical & Electronics Engineering Student | Engineering Problem Solver

+91 9363265477 | sarvathan9363@gmail.com | linkedin.com/in/sarvathan-c-923789315 | github.com/sarvathan9363-crypto | my-portfolio-eight-topaz-35.vercel.app

PROFESSIONAL SUMMARY

Electrical and Electronics Engineering student at PSG College of Technology with strong hands-on expertise in full stack web development. Independently designed, built, and deployed multiple end-to-end applications using React, Node.js, MongoDB, and REST APIs. Experienced with Web3 and blockchain integrations, AI-powered chat systems, and real-time data streaming via WebSockets. Proven ability to deliver complete software products under hackathon constraints and independently — combining an engineer's analytical approach with modern development practices.

EDUCATION

B.E. – Electrical and Electronics Engineering

PSG College of Technology, Coimbatore, Tamil Nadu

- Sandwich curriculum with structured industrial training exposure
- Coursework: Circuit Design, Power Electronics, Embedded Systems, Control Systems, IoT
- Self-directed study in full stack web development alongside core EEE curriculum

Currently Pursuing

TECHNICAL SKILLS

Frontend	React.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Framer Motion
Backend	Node.js, Express.js, REST API Design, Nodemailer
Database	MongoDB, Mongoose, SQL (basic)
DevTools	Git, GitHub, Vercel, Render, Vite, Postman, VS Code
Embedded	PLC Programming (Ladder Logic), Embedded C, Arduino, Sensor Integration, IoT Systems
EEE	Circuit Design, Electrical Systems Analysis, Power Electronics (basic)
Other	Solidity, Ethereum, MetaMask, WebSockets, React Native (Expo), OpenRouter AI API

PROJECTS

POLE — Proof of Learning Effort System

React (Vite), Node.js, Python, Ethereum, Solidity, MetaMask, OCR, LLM | Code Kalari Hackathon, IIIT Kottayam

- Architected a blockchain-based credential verification platform under 24-hour hackathon constraints
- Integrated OCR extraction and LLM-based document analysis for automated knowledge assessment
- Implemented Solidity smart contracts on Ethereum for tamper-proof credential storage
- Built QR-based instant access system for recruiters and academic institutions to verify credentials

Hackathon Project

Full Stack E-Commerce Mobile Application

React Native (Expo), Node.js, Express.js, MongoDB, REST API

- Developed a complete cross-platform mobile e-commerce app with end-to-end frontend and backend ownership
- Implemented user authentication, product browsing, cart management, wishlist, and order processing
- Designed and integrated database-driven REST API with category filtering and profile management

Independent Project

Web3 Real-Time Yield Tracker

Next.js, Node.js, WebSockets, Chart.js, Web3.js

- Built a DeFi analytics dashboard aggregating live APY data from multiple decentralized lending protocols
- Implemented real-time on-chain data streaming via WebSockets for live chart updates
- Integrated Web3.js to fetch yield data across multiple blockchain networks simultaneously

Independent Project

Full Stack Developer Portfolio

React, Tailwind CSS, Framer Motion, Node.js, Express, MongoDB, Nodemailer

- Designed and deployed a full stack portfolio with AI-powered chat assistant via OpenRouter API
- Built contact and feedback systems with automated email notifications using Nodemailer + Gmail
- Implemented smooth animations, premium UI design, and fully responsive mobile layout

Deployed — Vercel + Render

EXPERIENCE

Independent Full Stack Developer

Ongoing

Self-Directed Technical Projects

- Independently designed and deployed 4+ full stack applications from concept to production
- Managed complete project lifecycle — architecture, development, integration, and deployment
- Integrated third-party services including email systems, AI APIs, blockchain, and payment flows
- Deployed applications on Vercel (frontend) and Render (backend) with live production use

Hackathon Participant — Code Kalari, IIIT Kottayam

- Built a blockchain credential verification platform from concept to working prototype in 24 hours
- Collaborated under pressure to deliver a technically complex system combining AI, OCR, and Web3

Industrial Training — Sandwich Curriculum, PSG College of Technology

Ongoing

- Gained structured industrial exposure as part of the sandwich B.E. programme
- Applied electrical engineering principles in real industry environments

CERTIFICATIONS

- | | |
|---------------------------------|---|
| • React JS — Scaler | • HTML — Great Learning |
| • JavaScript — Scaler | • CSS — Great Learning |
| • C Programming — Scaler | • C Programming — Great Learning |
| • C++ — Scaler | • Diploma in Computer Applications (DCA) |

ACHIEVEMENTS

- Participated in Code Kalari 24-Hour Hackathon at IIIT Kottayam — built a blockchain-based learning verification platform under time constraints
- Independently developed and deployed 4+ full stack and Web3 applications to production
- Completed 7+ technical certifications in programming languages and frontend development
- Designed and built an AI-powered portfolio website integrating OpenRouter API, MongoDB, and automated email workflows
